ANNUAL REPORT AND ACCOUNTS 2012

Board of Directors J H Bartlett
 J S Blythe
 M R Illingworth
 W W L Lin
 A P Martin

REPORT OF THE DIRECTORS

The directors present their report and accounts for the year ended 31 December 2012.

Results and dividends

The loss for the year after taxation was \$4,308,000 which when added to the retained deficit brought forward at 1 January 2012 of \$7,905,000, gives a total retained deficit carried forward at 31 December 2012 of \$12,213,000

The company has not declared any dividends during the year (2011 \$Nil) The directors do not propose the payment of a final dividend

Principal activity and review of the business

The company has been set up to cover BP E&P activities in West Papua I PSC, located approximately 130kms south of the Tangguh unit BP farmed-in to 32% of the working interest of the Chevron operated PSC at the end of 2009 The PSC is in the initial exploration phase with seismic work started in 2011

No key financial and other performance indicators have been identified for this company

Principal risks and uncertainties

The company aims to deliver sustainable value by identifying and responding successfully to risks Risk management is integrated into the process of planning and performance management at a group level Monitoring and accountability for the management of these risks occur through quarterly performance reviews at a group level

We urge you to consider carefully the risks described below The potential impact of the occurrence or reoccurrence of any of the risks described below could have a material adverse effect on the company's business, financial position, results of operations, competitive position, cash flows, prospects, liquidity, shareholder returns and/or implementation of its strategic agenda

Company level risks have been categorised against the following areas strategic and commercial, compliance and control, and safety and operational and financial risk management In addition, we have also set out a further category of risk for your attention – those resulting from the 2010 Gulf of Mexico oil spill (the Incident)

Gulf of Mexico oil spill

The Gulf of Mexico oil spill has had and could continue to have a material adverse impact on BP as a group, and consequently may also have an adverse impact on BP West Papua I Limited

BP WEST PAPUA I LIMITED

REPORT OF THE DIRECTORS

Principal risks and uncertainties (continued)

Gulf of Mexico oil spill (continued)

Whilst the BP group recognised significant charges in the income statement since the Incident occurred in 2010, there is significant uncertainty regarding the extent and timing of the remaining costs and liabilities relating to the Incident the potential changes in applicable regulations and the operating environment that may result from the Incident, the impact of the Incident on the reputation of the group and the resulting possible impact on the group's licence to operate including its ability to access new opportunities. The amount of claims that become payable by the BP group, the amount of fines ultimately levied on the BP group (including any potential determination of the BP group's negligence or gross negligence), the outcome of litigation, the terms of any further settlements including the amount and timing of any payments thereunder, and any costs arising from any longer-term environmental consequences of the Incident, will also impact upon the ultimate cost for the BP group.

Although the provisions recognised represent the current best estimates of expenditures required to settle certain present obligations that can be reasonably estimated at the end of the reporting period, there are future expenditures for which it is not possible to measure the obligations reliably and the total amounts payable by the BP group in relation to all obligations relating to the Incident are subject to significant uncertainty. These uncertainties are likely to continue for a significant period, increase the risks to which the group is exposed and may cause costs to increase. Thus, the Incident has had, and could continue to have, a material adverse impact on the group's business, competitive position, financial performance, cash flows, prospects, liquidity, shareholder returns and/or implementation of its strategic agenda, particularly in the US. The risks associated with the Incident could also heighten the impact of the other risks to which the group is exposed as further described below. Further information on the Incident, is included within the BP group Annual Report and Form 20-F for the year ended 31 December 2012.

Strategic and commercial risks

Prices and markets

Oil, gas and product prices are subject to international supply and demand. Political developments and the outcome of meetings of OPEC can particularly affect world supply and oil prices. Previous oil price increases have resulted in increased fiscal take, cost inflation and more onerous terms for access to resources. As a result, increased oil prices may not improve margin performance. In addition to the adverse effect on revenues, margins and profitability from any fall in oil and natural gas prices, a prolonged period of low prices or other indicators would lead to further reviews for impairment of the company's oil and natural gas properties. Such reviews would reflect management's view of long-term oil and natural gas prices and could result in a charge for impairment that could have a significant effect on the company's results of operations in the period in which it occurs. Rapid material or sustained change in oil, gas and product prices can impact the validity of the assumptions on which strategic decisions are based and, as a result, the ensuing actions derived from those decisions may no longer be appropriate.

Governments are facing greater pressure on public finances, which may increase their motivation to intervene in the fiscal and regulatory frameworks of the oil and gas industry, including the risk of increased taxation, nationalisation and expropriation.

The global financial and economic situation may have a negative impact on third parties with whom the company does, or may do, business with. In particular, on-going instability in or a collapse of the Eurozone could trigger a new wave of financial crises and push the world back into recession, leading to lower demand and lower oil and gas prices.

BP WEST PAPUA I LIMITED

REPORT OF THE DIRECTORS

Principal risks and uncertainties (continued)

Strategic and commercial risks (continued)

Socio-political

The diverse nature of the company's operations around the world exposes it to a wide range of political developments and consequent changes to the operating environment, regulatory environment and law

The company has operations in countries where political, economic and social transition is taking place. Some countries have experienced or may experience in the future political instability, changes to the regulatory environment, expropriation or nationalisation of property, civil strife, strikes, acts of war and insurrections. Any of these conditions occurring could disrupt or terminate the company's operations, causing its development activities to be curtailed or terminated in these areas or its production to decline, could limit the company's ability to pursue new opportunities, could affect the recoverability of its assets and could cause it to incur additional costs.

Investment efficiency

The company's organic growth is dependent on creating a portfolio of quality options and investing in the best options. Ineffective investment selection and development could lead to loss of value and higher capital expenditure.

Major project delivery

Successful execution of the company's plan depends critically on implementing the activities to deliver the major projects over the plan period. Poor delivery of any major project that underpins production or production growth, and/or a major programme designed to enhance shareholder value, including maintenance turnaround programmes, could adversely affect the company's financial performance. Successful project delivery requires, among other things, adequate engineering and other capabilities and therefore successful recruitment and development of staff is central to the company's plans.

Compliance and control risks

Regulatory

Due to the Gulf of Mexico oil spill, it is likely that there will be more stringent regulation of the BP group's oil and gas activities in the US and elsewhere, particularly relating to environmental, health and safety controls and oversight of drilling operations as well as access to new drilling areas.

Regulatory or legislative action may impact the industry as a whole and could be directed specifically towards the BP group. New regulations and legislation, the terms of the BP group's settlements with US government authorities and future settlements or litigation outcomes related to the Incident, and/or evolving practices could increase the cost of compliance and may require changes to the company's drilling operations, exploration, development and decommissioning plans, and could impact the company's ability to capitalise on its assets and limit its access to new exploration properties or operatorships. In addition, increases in taxes, royalties and other amounts payable to governments or governmental agencies, or restrictions on availability of tax relief, could also be imposed as a response to the Incident.

In addition, the oil industry in general is subject to regulation and intervention by governments throughout the world in such matters as the award of exploration and production interests, the imposition of specific drilling obligations, environmental, health and safety controls, controls over the development and decommissioning of a field (including restrictions on production) and, possibly, nationalisation, expropriation, cancellation or non-renewal of contract rights.

BP WEST PAPUA I LIMITED

REPORT OF THE DIRECTORS

Principal risks and uncertainties (continued)

Compliance and control risks (continued)

Regulatory (continued)

Failure to respond to changes in trading regulations could result in regulatory action and damage to the company's reputation. The oil industry is also subject to the payment of royalties and taxation which tend to be high compared with those payable in respect of other commercial activities, and operates in certain tax jurisdictions that have a degree of uncertainty relating to the interpretation of, and changes to, tax law. As a result of new laws and regulations or other factors, the company could be required to curtail or cease certain operations, or could incur additional costs.

Liabilities and provisions

The BP group's potential liabilities resulting from pending and future claims, lawsuits, settlements and enforcement actions relating to the Gulf of Mexico oil spill, together with the potential cost and burdens of implementing remedies sought in the various proceedings, cannot be fully estimated at this time but they have had, and are expected to continue to have, a material adverse impact on the group's business and consequently may also impact the company's business. Further information is included within the BP group Annual Report and Form 20-F for the year ended 31 December 2012.

Reporting

External reporting of financial and non-financial data is reliant on the integrity of systems and people. Failure to report data accurately and in compliance with external standards could result in regulatory action, legal liability and damage to the company's reputation.

Safety and operational risks

Process safety, personal safety and environmental risks

The nature of the company's operations exposes it to a wide range of significant health, safety, security and environmental risks. The scope of these risks is influenced by the geographic range, operational diversity and technical complexity of the company's activities. In addition, in many of the company's major projects and operations, risk allocation and management is shared with third parties, such as contractors, sub-contractors, joint venture partners and associates.

There are risks of technical integrity failure as well as risk of natural disasters and other adverse conditions in many of the areas in which the company operates, which could lead to loss of containment of hydrocarbons and other hazardous material, as well as the risk of fires, explosions or other incidents.

The company's operations are often conducted in difficult or environmentally sensitive locations, in which the consequences of a spill, explosion, fire or other incident could be greater than in other locations. These operations are subject to various environmental and safety laws, regulations and permits and the consequences of failure to comply with these requirements can include remediation obligations, penalties, loss of operating permits and other sanctions. Accordingly, inherent in the company's operations is the risk that if it fails to abide by environmental and safety and protection standards, such failure could lead to damage to the environment and could result in regulatory action, legal liability, material costs and damage to the company's reputation or licence to operate.

BP's group-wide operating management system (OMS) intends to address health, safety, security, environmental and operations risks, and to provide a consistent framework within which the group can analyse the performance of its activities and identify and remediate shortfalls. There can be no assurance that OMS will adequately identify all process safety, personal safety and environmental risk or provide the correct mitigations, or that all operations will be in conformance with OMS at all times.

BP WEST PAPUA I LIMITED

REPORT OF THE DIRECTORS

Principal risks and uncertainties (continued)

Safety and operational risks (continued)

Security

Security threats require continuous oversight and control. Acts of terrorism, piracy, sabotage, cyber-attacks and similar activities directed against the company's operations and offices, pipelines, transportation or computer systems could cause harm to people and could severely disrupt business and operations. The company's business activities could also be severely disrupted by, amongst other things, conflict, civil strife or political unrest in areas where the company operates.

Drilling and production

Exploration and production require high levels of investment and are subject to natural hazards and other uncertainties, including those relating to the physical characteristics of an oil or natural gas field. The company's exploration and production activities are often conducted in extremely challenging environments, which heighten the risks of technical integrity failure and natural disasters discussed above. The cost of drilling, completing or operating wells is often uncertain. The company may be required to curtail, delay or cancel drilling operations because of a variety of factors, including unexpected drilling conditions, pressure or irregularities in geological formations, equipment failures or accidents, adverse weather conditions and compliance with governmental requirements.

In addition, exploration expenditure may not yield adequate returns, for example in the case of unproductive wells or discoveries that prove uneconomic to develop. The Gulf of Mexico incident illustrates the risks the company faces in its drilling and production activities.

Financial risk management

The main financial risk faced by the company through its normal business activities is market risk. The management of these financial risks is performed at BP group level. The company seeks to maintain a financial framework to ensure that it is able to maintain an appropriate level of liquidity and financial capacity. This framework constrains the level of assessed capital at risk for the purposes of positions taken in financial instruments. Failure to accurately forecast or maintain sufficient liquidity and credit to meet these needs could impact the company's ability to operate and result in a financial loss.

Market risk

Market risk is the risk or uncertainty arising from possible market price movements and their impact on the future performance of a business. This includes the possibility that changes in foreign currency exchange rates, interest rates or oil, natural gas and power prices will adversely affect the value of the company's financial assets, liabilities or expected future cash flows. The management of such risks is performed at BP group level. The group has developed a control framework aimed at managing the volatility inherent in certain of its natural business exposures. In accordance with this control framework the group enters into various transactions using derivatives for risk management purposes.

BP WEST PAPUA I LIMITED

REPORT OF THE DIRECTORS

Going concern

The directors consider that, despite the uncertainties deriving from the current economic environment and the loss reported for the year, the company has adequate resources to continue in operational existence for the foreseeable future

Directors

The present directors are listed on page 1

There have been no director appointments or resignations since 1 January 2012

Directors' indemnity

The company indemnifies the directors in its Articles of Association to the extent allowed under section 232 of the Companies Act 2006

Policy and practice on payment of creditors

It is the company's policy to follow the CBI's prompt payment code of practice for all suppliers to the company with payments made in accordance with the relevant contractual payment terms. A copy of the code of practice may be obtained from the CBI

The number of days' purchases represented by trade creditors at the year-end was nil

Auditor

In the absence of a notice proposing that the appointment be terminated, Ernst & Young LLP will be deemed to be re-appointed as the company's auditor for the next year

BP WEST PAPUA I LIMITED

REPORT OF THE DIRECTORS

Directors' statement as to the disclosure of information to the auditor

The directors who were members of the board at the time of approving the directors' report are listed on page 1. Having made enquiries of fellow directors and of the company's auditor, each of these directors confirms that

- To the best of each director's knowledge and belief, there is no information relevant to the preparation of their report of which the company's auditor is unaware, and
- Each director has taken all the steps a director might reasonably be expected to have taken to be aware of relevant audit information and to establish that the company's auditor is aware of that information

BP WEST PAPUA I LIMITED

STATEMENT OF DIRECTORS' RESPONSIBILITIES IN RESPECT OF THE ACCOUNTS

The directors are responsible for preparing the Directors' Report and the financial statements in accordance with applicable law and regulations

Company law requires the directors to prepare financial statements for each financial year. Under that law the directors have elected to prepare the financial statements in accordance with United Kingdom Generally Accepted Accounting Practice (United Kingdom accounting standards and applicable law). Under company law the directors must not approve the financial statements unless they are satisfied that they give a true and fair view of the state of affairs of the company and the profit or loss for that period. In preparing these accounts, the directors are required to

- select suitable accounting policies and then apply them consistently
- make judgements and estimates that are reasonable and prudent.
- state whether applicable United Kingdom accounting standards have been followed, subject to any material departures disclosed and explained in the financial statements and
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the company will continue in business

The directors are responsible for keeping adequate accounting records that are sufficient to show and explain the company's transactions and disclose with reasonable accuracy at any time the financial position of the company and enable them to ensure that the financial statements comply with the Companies Act 2006. They are also responsible for safeguarding the assets of the company and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities.

The directors confirm that they have complied with these requirements and, having a reasonable expectation that the company has adequate resources to continue in operational existence for the foreseeable future, continue to adopt the going concern basis in preparing the accounts.

BP WEST PAPUA I LIMITED

INDEPENDENT AUDITOR'S REPORT TO THE MEMBERS OF
BP WEST PAPUA I LIMITED

We have audited the financial statements of BP West Papua I Limited for the year ended 31 December 2012 which comprise the Profit and Loss Account the Statement of Total Recognised Gains and Losses, the Balance Sheet, the accounting policies and the related notes 1 to 12. The financial reporting framework that has been applied in their preparation is applicable law and United Kingdom Accounting Standards (United Kingdom Generally Accepted Accounting Practice).

This report is made solely to the company's members as a body in accordance with Chapter 3 of Part 16 of the Companies Act 2006. Our audit work has been undertaken so that we might state to the company's members those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the company and the company's members as a body, for our audit work, for this report, or for the opinions we have formed.

Respective responsibilities of directors and auditor

As explained more fully in the Statement of Directors' Responsibilities set out on page 8, the directors are responsible for the preparation of the financial statements and for being satisfied that they give a true and fair view. Our responsibility is to audit and express an opinion on the financial statements in accordance with applicable law and International Standards on Auditing (UK and Ireland). These standards require us to comply with the Auditing Practices Board's Ethical Standards for Auditors.

Scope of the audit of the financial statements

An audit involves obtaining evidence about the amounts and disclosures in the financial statements sufficient to give reasonable assurance that the financial statements are free from material misstatement, whether caused by fraud or error. This includes an assessment of whether the accounting policies are appropriate to the company's circumstances and have been consistently applied and adequately disclosed, the reasonableness of significant accounting estimates made by the directors, and the overall presentation of the financial statements. In addition, we read all the financial and non-financial information in the Annual Report and Accounts to identify material inconsistencies with the audited financial statements. If we become aware of any apparent material misstatements or inconsistencies we consider the implications for our report.

Opinion on financial statements

In our opinion the financial statements

- give a true and fair view of the state of the company's affairs as at 31 December 2012 and of its loss for the year then ended,
- have been properly prepared in accordance with United Kingdom Generally Accepted Accounting Practice and
- have been prepared in accordance with the requirements of the Companies Act 2006.

Opinion on other matter prescribed by the Companies Act 2006

In our opinion the information given in the Directors' Report for the financial year for which the financial statements are prepared is consistent with the financial statements.

Matters on which we are required to report by exception

We have nothing to report in respect of the following matters where the Companies Act 2006 requires us to report to you if, in our opinion:

- adequate accounting records have not been kept, or returns adequate for our audit have not been received from branches not visited by us, or
- the financial statements are not in agreement with the accounting records and returns, or
- certain disclosures of directors' remuneration specified by law are not made, or
- we have not received all the information and explanations we require for our audit.

Ernst & Young LLP

Paul Wallek (Senior Statutory Auditor)

25 July 2013

BP WEST PAPUA I LIMITED

ACCOUNTING POLICIES

Accounting standards

The financial statements of BP West Papua I Limited were approved for issue by the Board of Directors on **16 JULY** 2013

These accounts are prepared on a going concern basis and in accordance with the Companies Act 2006 and applicable UK accounting standards

In addition to the requirements of accounting standards, the accounting for exploration and production activities is governed by the Statement of Recommended Practice ('SORP') 'Accounting for Oil and Gas Exploration, Development, Production and Decommissioning Activities' issued by the UK Oil Industry Accounting Committee on 7 June 2001

These accounts have been prepared in accordance with the provisions of the SORP

Accounting convention

The accounts are prepared under the historical cost convention.

Statement of cash flows

The group accounts of the ultimate parent undertaking contain a consolidated cash flow statement. The company has taken advantage of the exemption granted by the Financial Reporting Standard No 1 (Revised), whereby it is not required to publish its own cash flow statement

Intangible assets

Intangible assets include expenditure on the exploration for and evaluation of oil and natural gas resources, computer software, patents, licences, trademarks and product development costs. Product development costs are capitalised as intangible assets when a project has obtained sanction and the future recoverability of such costs can reasonably be regarded as assured.

Intangible assets are not depreciated. The indefinite life of intangible assets is reviewed on an annual basis and, if necessary, changes in useful lives are accounted for prospectively.

The carrying value of intangible assets is reviewed for impairment if events or changes in circumstances indicate the carrying value may not be recoverable. To the extent that the carrying amount exceeds the recoverable amount, that is, the higher of net realisable value and value in use, the asset is written down to its recoverable amount. The value in use is determined from estimated discounted future net cash flows.

Oil and natural gas exploration and development expenditure

Oil and natural gas exploration and development expenditure is accounted for using the successful efforts method of accounting.

BP WEST PAPUA I LIMITED

ACCOUNTING POLICIES

Licence and property acquisition costs

Exploration licence and property leasehold acquisition costs are initially capitalised within intangible fixed assets. Upon determination of economically recoverable reserves ('proved reserves' or 'commercial reserves'), the costs are aggregated with exploration expenditure and held on a field-by-field basis as proved properties awaiting approval within intangible assets. When development is sanctioned, the relevant expenditure is transferred to tangible production assets.

Each property is reviewed on an annual basis to confirm that drilling activity is planned and the property is not impaired. If no future activity is planned, the remaining balance of the licence and property acquisition costs is written off.

Other debtors

Other debtors are carried at the original invoice amount, less allowances made for doubtful receivables. Provision is made when there is objective evidence that the company will be unable to recover balances in full. Balances are written off when the probability of recovery is assessed as being remote.

Other creditors

Other creditors are carried at payment or settlement amounts. If the effect of the time value of money is material, other creditors are determined by discounting the expected future cash flows at a pre-tax rate.
